How to perform a Property Search

Property Tax Assessments can be viewed in a number of different ways. The following is a overview of the "Serach by Roll" and "Advanced Search" methods to perform Property Searches and the results that will be displayed when searching.

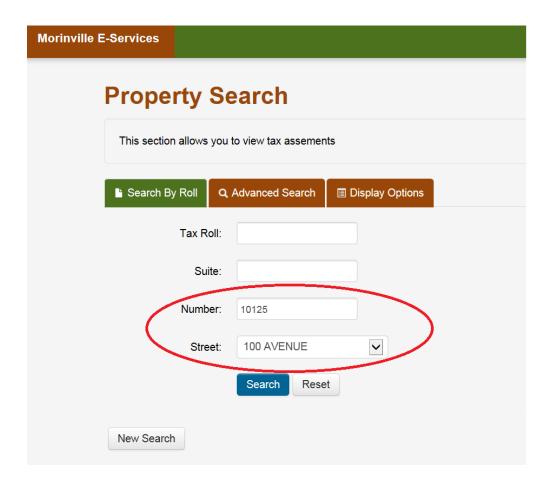

Search By Roll

1. Tax Roll – Enter the Tax Roll number and click "Search"

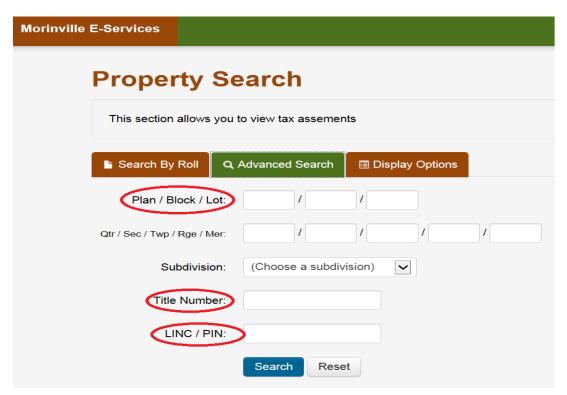

2. Civic Address – Enter the full civic address and click "Search".

Please note – The "Street" drop down menu contains a complete listing of all streets and / or avenues in our database, including inactive accounts. Our best practice for assigning addresses in our current accounting system is to use the full name of a specific address with no abbreviations and / or symbols. For example – "AVENUE" or "STREET" vs. Ave, ST., *, etc.

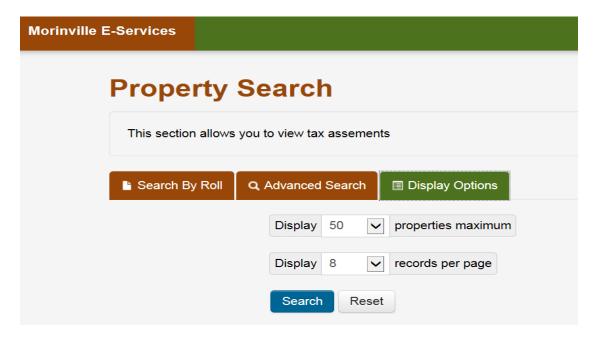

Advanced Search

1. Enter either Plan / Block / Lot, Title Number of LINC Number and click "Search"

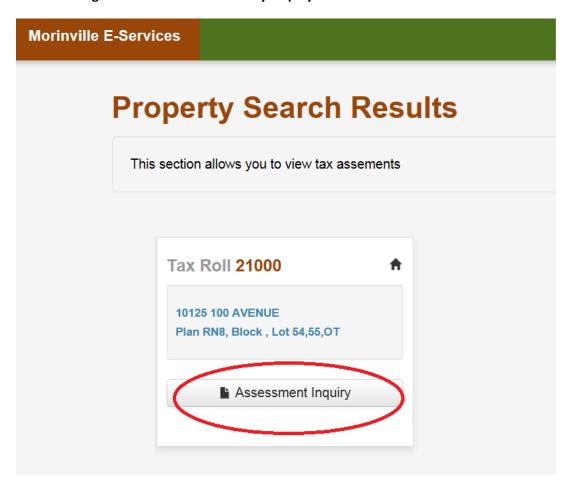

Display Options

You can modify your display options to include a certain number of properties and records per page.

Once your Search criteria has been input, click "Search".

The following information will be initially displayed:

The following information will be displayed once clicking on "Assessment Inquiry":
